Accommodation Location

How to View Accommodation Details and Booking Options

1. Open the Internships page or the corresponding Topics page.
2. Select the relevant focused area.
3. Select the available duration, mode and internship type.
4. Choose **Offline** mode to access accommodation booking options.
5. Continue to the fee/payment page and use the **Branches Select Option**.
6. After selecting the branch, use **Book NTHRYS Accommodation** to view accommodation fee, facility photographs, amenities and the available booking details.

Applied Microbiology Internship Topics and Focused Areas

AI Industrial Applied Microbiology Research

- AI-Driven Microbial Strain Optimization
- Predictive Microbial Contamination Detection
- Machine Learning for Antibiotic Resistance Profiling
- Automated Microbial Ecosystem Modeling
- Deep Learning for Microbial Morphology and Classification

Machine Learning Food Microbiology Research

- Predictive Modeling of Microbial Spoilage in Perishable Foods
- Automated Pathogen Detection Using Computer Vision and Deep Learning
- Fermentation Process Optimization via Machine Learning
- Genomic Data Analysis for Foodborne Pathogen Identification

- Real-Time Microbial Risk Assessment in Food Processing Facilities

Applied Bioremediation Microbiology Research

- Heavy Metal Biosorption by Microbial Consortia
- Petroleum Hydrocarbon Degradation Pathways
- Xenobiotic Compound Biodegradation Engineering
- Biofilm-based Treatment Systems for Industrial Effluents
- Mycoremediation of Contaminated Substrates

AI Agricultural Applied Microbiology Research

- Microbial Pathogen Detection in Crop Systems
- Beneficial Soil Microbiome Characterization
- Biocontrol Agent Development and Testing
- Fermentation Optimization for Microbial Biopesticides
- Plant Microbiome Manipulation for Stress Resilience

AI Probiotic Development Research

- Strain Identification and Characterization
- In Vitro Efficacy Testing
- Fermentation Optimization and Scale-Up
- Formulation Development and Stability Studies
- Genomic Analysis and AI Model Development

Fermentation Optimization Bioprocess Research

- Microbial Strain Optimization for Enhanced Metabolite Production
- Bioreactor Process Parameter Development and Scale-Up
- Substrate Utilization and Media Formulation Studies
- Metabolic Pathway Analysis and Enzyme Kinetics in Fermentation
- Fed-Batch Fermentation Strategy Development and Control

Wastewater Treatment Microbiology Research

- Microbial Community Profiling in Activated Sludge Systems
- Isolation and Characterization of Novel Nitrifying Microorganisms
- Biofilm Formation and Extracellular Polymeric Substances (EPS) Analysis
- Antibiotic Resistance Gene Persistence in Wastewater Treatment Processes
- Enzymatic Degradation of Recalcitrant Organic Pollutants

Refrigerated Food Spoilage Microbiology

- Psychrophilic Bacterial Isolation and Characterization

- Lipid Oxidation and Rancidity Development in Refrigerated Foods
- Biofilm Formation on Food Contact Surfaces at Low Temperatures
- Pathogenic *Listeria monocytogenes* Survival and Proliferation in Refrigerated Environments
- Spoilage Metabolite Production and Sensory Quality Prediction in Chilled Products
