Biological Engineering Internship Categories

AI Genetic Circuit Design Research https://internships.nthrys.com/biological-engineering/ai-genetic-circuit-design-research	Machine Learning Metabolic Engineering Research https://internships.nthrys.com/biological-engineering/machine-learning-metabolic-engineering-research
AI Biological System Modeling Research https://internships.nthrys.com/biological-engineering/ai-biological-system-modeling-research	AI Directed Evolution Biological Research https://internships.nthrys.com/biological-engineering/ai-directed-evolution-biological-research
AI Biosensor Engineering Research https://internships.nthrys.com/biological-engineering/ai-biosensor-engineering-research	AI Cell Factory Engineering Research https://internships.nthrys.com/biological-engineering/ai-cell-factory-engineering-research
AI Protein Engineering Applications Research https://internships.nthrys.com/biological-engineering/ai-protein-engineering-applications-research	AI CRISPR Biological Engineering Research https://internships.nthrys.com/biological-engineering/ai-crispr-biological-engineering-research
AI Biological Engineering Safety Research https://internships.nthrys.com/biological-engineering/ai-biological-engineering-safety-research	AI Tissue Engineering Biological Research https://internships.nthrys.com/biological-engineering/ai-tissue-engineering-biological-research
Synthetic Biology Circuit Construction Research https://internships.nthrys.com/biological-engineering/synthetic-biology-circuit-construction-research	Enzyme Engineering Optimization Research https://internships.nthrys.com/biological-engineering/enzyme-engineering-optimization-research
Biofuel Production Engineering Research https://internships.nthrys.com/biological-engineering/biofuel-production-engineering-research	Bioremediation Microbial Engineering Research https://internships.nthrys.com/biological-engineering/bioremediation-microbial-engineering-research
Antibody Engineering Drug Development Research https://internships.nthrys.com/biological-engineering/antibody-engineering-drug-development-research	Microbial Consortium Engineering Research https://internships.nthrys.com/biological-engineering/microbial-consortium-engineering-research
Plant Synthetic Biology Engineering Research https://internships.nthrys.com/biological-engineering/plant-synthetic-biology-engineering-research	Bioreactor Scale-Up Engineering Research https://internships.nthrys.com/biological-engineering/bioreactor-scale-up-engineering-research
Biomaterials Protein Production Research https://internships.nthrys.com/biological-engineering/biomaterials-protein-production-research	Fermentation Bioprocess Optimization Research https://internships.nthrys.com/biological-engineering/fermentation-bioprocess-optimization-research
Membrane Protein Engineering Research https://internships.nthrys.com/biological-engineering/membrane-protein-engineering-research	Extremophile Enzyme Discovery Research https://internships.nthrys.com/biological-engineering/extremophile-enzyme-discovery-research
Algae Bioproduction Engineering Research https://internships.nthrys.com/biological-engineering/algae-bioproduction-engineering-research	Organ-on-Chip Bioengineering Research https://internships.nthrys.com/biological-engineering/organ-on-chip-bioengineering-research
Immunoengineering CAR-T Cell Research https://internships.nthrys.com/biological-engineering/immunoengineering-car-t-cell-research	Nucleic Acid Aptamer Engineering Research https://internships.nthrys.com/biological-engineering/nucleic-acid-aptamer-engineering-research
Scaffold Protein Network Engineering Research https://internships.nthrys.com/biological-engineering/scaffold-protein-network-engineering-research	Bacterial Strain Development Research https://internships.nthrys.com/biological-engineering/bacterial-strain-development-research
Biosurfactant Production Engineering Research https://internships.nthrys.com/biological-engineering/biosurfactant-production-engineering-research	DNA Nanotechnology Assembly Research https://internships.nthrys.com/biological-engineering/dna-nanotechnology-assembly-research
Lactobacillus Probiotic Engineering Research https://internships.nthrys.com/biological-engineering/lactobacillus-probiotic-engineering-research	Mycorrhizal Fungi Bioengineering Research https://internships.nthrys.com/biological-engineering/mycorrhizal-fungi-bioengineering-research

Whole-Cell Biocatalyst Development Research https://internships.nthrys.com/biological-engineering/whole-cell-biocatalyst-development-research	Metabolic Flux Analysis Research https://internships.nthrys.com/biological-engineering/metabolic-flux-analysis-research
RNA Interference Engineering Research https://internships.nthrys.com/biological-engineering/ma-interference-engineering-research	Enzyme Immobilization Bioprocess Research https://internships.nthrys.com/biological-engineering/enzyme-immobilization-bioprocess-research
Fungal Strain Engineering Research https://internships.nthrys.com/biological-engineering/fungal-strain-engineering-research	Bioluminescence Biosensor Development Research https://internships.nthrys.com/biological-engineering/bioluminescence-biosensor-development-research
Peptide Therapeutics Engineering Research https://internships.nthrys.com/biological-engineering/peptide-therapeutics-engineering-research	Biofilm Engineering Microbial Research https://internships.nthrys.com/biological-engineering/biofilm-engineering-microbial-research
Codon Optimization Protein Expression Research https://internships.nthrys.com/biological-engineering/codon-optimization-protein-expression-research	Thermophile Fermentation Process Research https://internships.nthrys.com/biological-engineering/thermophile-fermentation-process-research
Immunotoxin Engineering Research https://internships.nthrys.com/biological-engineering/immunotoxin-engineering-research	Cellulose Degradation Engineering Research https://internships.nthrys.com/biological-engineering/cellulose-degradation-engineering-research
Exosome Bioengineering Therapeutic Research https://internships.nthrys.com/biological-engineering/exosome-bioengineering-therapeutic-research	Photosynthetic Bioengineering Research https://internships.nthrys.com/biological-engineering/photosynthetic-bioengineering-research
Bioprinting Tissue Construct Research https://internships.nthrys.com/biological-engineering/bioprinting-tissue-construct-research	Fermentation Media Formulation Research https://internships.nthrys.com/biological-engineering/fermentation-media-formulation-research
Biopolymer Production Engineering Research https://internships.nthrys.com/biological-engineering/biopolymer-production-engineering-research	Horizontal Gene Transfer Control Research https://internships.nthrys.com/biological-engineering/horizontal-gene-transfer-control-research

Biological Engineering Internship Topics and Focused Areas

No active focused areas are currently available.

Generated on demand by NTHRYS. This PDF is not stored on the server; it is streamed directly to the browser from the current database content.
