Accommodation Location

How to View Accommodation Details and Booking Options

1. Open the Internships page or the corresponding Topics page.
2. Select the relevant focused area.
3. Select the available duration, mode and internship type.
4. Choose **Offline** mode to access accommodation booking options.
5. Continue to the fee/payment page and use the **Branches Select Option**.
6. After selecting the branch, use **Book NTHRYS Accommodation** to view accommodation fee, facility photographs, amenities and the available booking details.

Bionics Internship Categories

AI Bioinspired Sensing System Research https://internships.nthrys.com/bionics/ai-bioinspired-sensing-system-research	Machine Learning for Neural Prosthetics Research https://internships.nthrys.com/bionics/machine-learning-neural-prosthetics-research
AI Bionic Limb Intelligence Research https://internships.nthrys.com/bionics/ai-bionic-limb-intelligence-research	AI Cochlear & Retinal Implant Research https://internships.nthrys.com/bionics/ai-cochlear-retinal-implant-research
AI Exoskeleton Control System Research https://internships.nthrys.com/bionics/ai-exoskeleton-control-system-research	AI Bionic Eye Development Research https://internships.nthrys.com/bionics/ai-bionic-eye-development-research
AI Brain-Machine Interface Bionics Research https://internships.nthrys.com/bionics/ai-brain-machine-interface-bionics-research	AI Biohybrid Bionics Integration Research https://internships.nthrys.com/bionics/ai-biohybrid-bionics-integration-research
AI Soft Bionic Actuator Research https://internships.nthrys.com/bionics/ai-soft-bionic-actuator-research	AI Bionic Organ Development Research https://internships.nthrys.com/bionics/ai-bionic-organ-development-research
Biomimetic Material Characterization Research https://internships.nthrys.com/bionics/biomimetic-material-characterization-research	Neural Signal Processing Algorithm Development https://internships.nthrys.com/bionics/neural-signal-processing-algorithm-development
Sensory Feedback Integration Systems Research https://internships.nthrys.com/bionics/sensory-feedback-integration-systems-research	Myoelectric Pattern Recognition Study https://internships.nthrys.com/bionics/myoelectric-pattern-recognition-study

Bone-Implant Interface Osseointegration Research https://internships.nthrys.com/bionics/bone-implant-interface-osseointegration-research	Bionic Skin Sensor Development Research https://internships.nthrys.com/bionics/bionic-skin-sensor-development-research
Robotic Gait Analysis Optimization Research https://internships.nthrys.com/bionics/robotic-gait-analysis-optimization-research	Implantable Power System Efficiency Research https://internships.nthrys.com/bionics/implantable-power-system-efficiency-research
Vision Restoration Algorithm Validation Study https://internships.nthrys.com/bionics/vision-restoration-algorithm-validation-study	Vestibular System Balance Control Research https://internships.nthrys.com/bionics/vestibular-system-balance-control-research
Electroactive Polymer Actuator Design Research https://internships.nthrys.com/bionics/electroactive-polymer-actuator-design-research	Neuromuscular Interface Biocompatibility Study https://internships.nthrys.com/bionics/neuromuscular-interface-biocompatibility-study

Implant Biofilm Formation Prevention Research https://internships.nthrys.com/bionics/implant-biofilm-formation-prevention-research	Sensorimotor Learning Protocol Development Research https://internships.nthrys.com/bionics/sensorimotor-learning-protocol-development-research

Bionics Internship Topics and Focused Areas

Neural Signal Processing Algorithm Development

- EEG Signal Classification for Motor Intent Detection
- Electromyography (EMG) Pattern Recognition for Prosthetic Control
- Spike Train Analysis and Neural Decoding
- Artifact Removal and Signal Quality Enhancement in Neural Recordings
- Deep Learning for Cortical Signal Decoding in Brain-Computer Interfaces

Neuromuscular Interface Biocompatibility Study

- Biocompatibility Assessment of Electrode Materials
- Foreign Body Response Characterization in Neural Tissue
- Surface Coating Optimization for Enhanced Integration
- Electrochemical Characterization and Neuronal Signal Fidelity
- In Vivo Biocompatibility Testing and Chronic Implant Validation
