Accommodation Location

How to View Accommodation Details and Booking Options

1. Open the Internships page or the corresponding Topics page.
2. Select the relevant focused area.
3. Select the available duration, mode and internship type.
4. Choose **Offline** mode to access accommodation booking options.
5. Continue to the fee/payment page and use the **Branches Select Option**.
6. After selecting the branch, use **Book NTHRYS Accommodation** to view accommodation fee, facility photographs, amenities and the available booking details.

Food Microbiology Internship Topics and Focused Areas

AI Foodborne Pathogen Genomics Research

- Whole Genome Sequencing Analysis of Pathogenic Bacteria
- Machine Learning Models for Pathogen Detection and Classification
- Phylogenetic and Epidemiological Outbreak Investigations
- Antimicrobial Resistance Gene Profiling and Characterization
- Comparative Genomics and Virulence Factor Identification

AI Fermented Food Microbiome Research

- Metagenomic Analysis of Fermented Food Microbiomes
- Machine Learning Classification of Fermentation Microbes
- Microbial Metabolite Production Prediction Using AI

- Fermentation Quality Control and Spoilage Detection
- Microbial Strain Isolation and Genomic Characterization

AI Novel Antimicrobial Food Research

- AI-Driven Pathogen Detection in Food Matrices
- Natural Antimicrobial Compound Screening and Optimization
- Microbiome Analysis and Predictive Modeling for Food Safety
- Smart Packaging Solutions with AI-Integrated Antimicrobial Coatings
- Deep Learning for Antimicrobial Resistance Prediction and Gene Analysis

Spore-Forming Bacteria Dairy Processing

- Bacillus and Clostridium Contamination Detection in Dairy Products
- Thermal Resistance and Inactivation Kinetics of Dairy Spores
- Spore Germination and Vegetative Growth in Dairy Environments
- Biofilm Formation by Spore-Forming Bacteria on Dairy Processing Equipment
- Spoilage Characteristics and Metabolic Byproducts of Dairy Spore-Formers

Mycotoxin-Producing Fungi Detection

- Aflatoxin Detection in Agricultural Commodities
- Ochratoxin A Monitoring in Coffee and Cereals
- Molecular Identification of Mycotoxigenic Fungal Species
- Fumonisin Production by Fusarium Species in Corn
- Development of Rapid Screening Methods for Multi-Mycotoxin Detection

Yeast Contamination Beverage Industry

- Yeast Species Identification and Characterization
- Fermentation Kinetics and Wild Yeast Impact
- Contamination Detection and Monitoring Methods
- Yeast Survival Under Processing Conditions
- Biofilm Formation and Equipment Surface Colonization

Biofilm Formation Food Contact Surfaces

- Biofilm Characterization on Stainless Steel Surfaces
- Antimicrobial Surface Coating Efficacy Testing
- Environmental Factors Influencing Biofilm Development
- Pathogenic and Spoilage Microorganism Biofilms in Food Systems
- Biofilm Removal and Sanitation Protocol Development

Food Additive Microbial Stability

- Antimicrobial Efficacy Testing of Natural Food Preservatives
- Microbial Resistance Development to Food Additives
- Synergistic Effects of Combined Food Additives on Microbial Control
- Thermal Stability of Antimicrobial Food Additives
- Microbial Adaptation in Preserved Food Products During Shelf Life

Bakery Product Mold Contamination Prevention

- Mold Identification and Taxonomy in Bakery Environments
- Antifungal Preservative Efficacy Testing
- Water Activity and Moisture Control in Mold Prevention
- Sanitation Protocol Development and Validation
- Packaging Material Impact on Mold Contamination
