General Medicine

The complete general medicine foundation for dental graduates and postgraduates — spanning clinical examination, the systemic medicine of every organ system, infectious, autoimmune and haematologic disease, medical emergencies and life support, special-population medicine, and the dental interface (oral manifestations of systemic disease, management of medically-compromised patients and drug-disease interactions), extended to laboratory interpretation and AI/telemedicine. Every module is delivered through structured clinical and applied-medicine teaching.

Sub-Streams at a Glance

This catalogue lists every General Medicine training protocol delivered at the NTHRYS Dental Sciences centre, organised under the **GM** department across 33 specialist sub-streams. Each protocol carries a unique code, a defined duration and a per-protocol fee, and may be combined into custom fellowship tracks. Protocols are pitched at practising specialists, postgraduates and digital-laboratory technologists.
