Chennai
Accommodation Location

How to View Accommodation Details and Booking Options

1. Open the Internships page or the corresponding Topics page.
2. Select the relevant focused area.
3. Select the available duration, mode and internship type.
4. Choose **Offline** mode to access accommodation booking options.
5. Continue to the fee/payment page and use the **Branches Select Option**.
6. After selecting the branch, use **Book NTHRYS Accommodation** to view accommodation fee, facility photographs, amenities and the available booking details.

Medical Physics Internship Categories

AI Radiation Therapy Optimization Research https://internships.nthrys.com/medical-physics/ai-radiation-therapy-optimization-research	Machine Learning Medical Imaging Physics Research https://internships.nthrys.com/medical-physics/machine-learning-medical-imaging-physics

Medical Physics Internship Topics and Focused Areas

AI Radiation Therapy Optimization Research

- Deep Learning Models for Dose Distribution Prediction
- Treatment Plan Optimization Using Reinforcement Learning
- Automated Organ Segmentation and Contour Refinement
- Patient-Specific QA Prediction Using Machine Learning
- Multi-Objective Optimization for Adaptive Radiation Therapy

Machine Learning Medical Imaging Physics Research

- Deep Learning for CT Image Reconstruction

- Radiomics Feature Extraction and Tumor Classification
- Adversarial Robustness in Medical Image Segmentation
- Generative Models for Medical Image Synthesis and Enhancement
- Federated Learning for Multi-Institutional Medical Imaging Analysis

AI MRI Physics Development Research

- Deep Learning for MRI Image Reconstruction
- Quantitative MRI Parameter Estimation
- MRI Physics Simulation and Synthetic Data Generation
- AI-Based Artifact Detection and Correction in MRI
- Accelerated Cardiac and Functional MRI with AI

AI Proton Therapy Physics Research

- Machine Learning for Proton Range Prediction
- Monte Carlo Simulation of Proton Beam Interactions
- Deep Learning for RBE Assessment in Proton Therapy
- AI-Based Quality Assurance for Treatment Plan Optimization
- Image Segmentation and Organ-at-Risk Delineation Using Deep Learning

AI Nuclear Medicine Physics Research

- AI-Assisted Radioisotope Imaging Analysis
- Deep Learning for Dosimetry Calculation Optimization
- Machine Learning-Based Quality Control in Nuclear Medicine
- Radiopharmaceutical Biodistribution Prediction Using AI
- Image Reconstruction and Artifact Reduction in Nuclear Medicine

AI Ultrasound Physics Research

- Deep Learning for Ultrasound Image Segmentation
- Physics-Informed Neural Networks for Acoustic Wave Propagation
- Artifact Reduction and Image Quality Enhancement in Ultrasound
- Real-Time Strain Elastography Analysis Using Machine Learning
- 3D Volumetric Ultrasound Reconstruction and Registration

AI Dosimetry Research

- Deep Learning Models for Dose Distribution Prediction
- Automated Organ-at-Risk Segmentation Using Computer Vision
- Dose Calculation Optimization with Machine Learning
- AI-Driven Treatment Plan Quality Assurance and Prediction

- Uncertainty Quantification in AI-Based Dosimetry Systems

AI Monte Carlo Medical Simulation Research

- Monte Carlo Dose Calculation Algorithm Optimization
- AI-Assisted Photon and Electron Transport Simulation
- Brachytherapy Source Modeling and Verification
- Patient-Specific Anatomy Integration in Monte Carlo Simulations
- Radiobiological Uncertainty Quantification Using Machine Learning

Brachytherapy Source Dosimetry Measurements

- Calibration and Characterization of Brachytherapy Sources
- Dose Rate Measurement Around Sealed Sources
- Monte Carlo Simulation of Brachytherapy Dose Distributions
- Radiation Protection and Shielding Assessment in Brachytherapy Labs
- Energy Spectrum Analysis and Detector Response Characterization

CT Image Quality Assessment Physics

- Artifact Detection and Mitigation in CT Imaging
- CT Dose Optimization and Image Quality Trade-offs
- Quantitative CT Image Quality Metrics and Assessment Methods
- Advanced Reconstruction Algorithm Evaluation and Optimization
- Spectral and Dual-Energy CT Image Quality Analysis

Positron Emission Tomography Reconstruction

- Iterative Reconstruction Algorithm Development
- Motion Correction in Dynamic PET Imaging
- Machine Learning for PET Image Enhancement
- Time-of-Flight (ToF) PET Reconstruction Methods
- Scatter and Attenuation Correction Strategies

X-ray Imaging Physics Characterization

- X-ray Beam Quality Assessment and Filtration Optimization
- Detector Performance Characterization and Calibration
- Spatial Resolution and Image Quality Analysis in Radiographic Systems
- Dose Rate Measurement and Radiation Safety Protocol Development
- Advanced X-ray Imaging Technique Evaluation and Optimization

Magnetic Resonance Spectroscopy Physics

- MRS Pulse Sequence Optimization

- Metabolite Quantification and Processing
- In Vivo MRS Protocol Development
- Magnetic Field Shimming and Homogeneity
- Clinical MRS Applications in Disease Assessment

Particle Accelerator Beam Commissioning

- Linac Output Calibration and Beam Quality Assessment
- Electron Beam Scattering Foil Optimization
- Photon Beam Flatness and Symmetry Characterization
- Bremsstrahlung Target Performance Analysis
- Multi-Leaf Collimator Leaf Bank Alignment and Verification

Radionuclide Therapy Physics Planning

- Dosimetry Calculations for Radionuclide Therapy
- Patient-Specific Treatment Planning for Radiopharmaceuticals
- Theranostic Imaging and Dosimetry Correlation
- Monte Carlo Simulation for Radionuclide Dose Assessment
- Quality Assurance and Dosimetry Protocol Development for Radionuclide Therapy

Image-Guided Radiation Therapy Guidance

- Cone Beam CT Image Reconstruction and Artifact Reduction
- Real-Time Patient Positioning and Deformation Tracking
- Dose Calculation Integration with Imaging Systems
- Multi-Modality Image Fusion for Treatment Planning
- Quality Assurance and Uncertainty Analysis in Image-Guided Systems

Photoacoustic Imaging Physics Development

- Acoustic Wave Propagation Modeling in Biological Tissues
- Light-Tissue Interaction and Optical Fluence Distribution
- Photoacoustic Signal Detection and Processing Optimization
- Contrast Agent Development for Molecular Photoacoustic Imaging
- In Vivo Photoacoustic Imaging System Performance Validation

Magnetic Field Distortion Measurements MRI

- Shimming Coil Design and Optimization
- Spatial Mapping of B0 Field Distortions
- Susceptibility-Induced Artifacts Characterization
- Real-Time Field Stability Monitoring Systems

- Environmental Magnetic Interference Assessment and Mitigation

Megavoltage Photon Beam Characterization

- Depth Dose Profile Analysis and Modeling
- Beam Output and Dose Rate Measurements
- Off-Axis Ratio and Beam Symmetry Characterization
- Energy Spectrum and Beam Quality Assessment
- Photon Beam Commissioning and Validation

Shielding Material Activation Analysis

- Neutron Activation Cross-Section Measurement
- Induced Radioactivity Assessment in Clinical Shielding
- Computational Modeling of Shielding Material Activation
- Environmental Impact of Activated Shielding Waste
- Novel Shielding Material Development and Activation Testing
