Kolkata

Accommodation Location

How to View Accommodation Details and Booking Options

1. Open the Internships page or the corresponding Topics page.
2. Select the relevant focused area.
3. Select the available duration, mode and internship type.
4. Choose **Offline** mode to access accommodation booking options.
5. Continue to the fee/payment page and use the **Branches Select Option**.
6. After selecting the branch, use **Book NTHRYS Accommodation** to view accommodation fee, facility photographs, amenities and the available booking details.

Nanotechnology Internship Topics and Focused Areas

AI Nano-Drug Delivery Research

- Machine Learning Models for Nanoparticle Design Optimization
- Computer Vision for Nanoparticle Characterization and Analysis
- AI-Driven Drug-Nanoparticle Interaction Simulation and Modeling
- Natural Language Processing for Nano-Drug Literature Mining and Knowledge Extraction
- Reinforcement Learning for Autonomous Optimization of Delivery Parameters

Machine Learning Nano-Composite Research

- Predictive Modeling of Nano-Composite Material Properties
- Image Analysis and Defect Detection in Nano-Composite Structures

- Optimization of Nano-Filler Dispersion Using Machine Learning
- Classification and Characterization of Nano-Composite Performance
- High-Throughput Screening of Nano-Composite Candidates

Quantum Dot Fluorescence Studies

- Quantum Dot Synthesis and Characterization
- Surface Functionalization and Bioconjugation
- Fluorescence Quantum Yield and Photophysical Properties
- Biological Imaging and Cellular Uptake Studies
- Multiplexing and Sensor Development

Organic-Inorganic Nanocomposite Development

- Polymer-Clay Nanocomposite Synthesis and Characterization
- Metal Oxide Nanoparticle Integration in Polymer Matrices
- Carbon-Based Nanocomposites for Electronics and Energy Applications
- Silica-Based Nanocomposites for Structural and Thermal Management
- Biopolymer-Inorganic Nanocomposites for Biodegradable Applications

Nanoparticle Cluster Assembly and Organization

- Self-Assembly of Gold Nanoparticles into Superlattice Structures
- Directed Assembly of Nanoparticle Clusters via Microfluidic Control
- Polymer-Nanoparticle Hybrid Assemblies for Functional Materials
- Stimuli-Responsive Nanoparticle Cluster Assembly and Disassembly
- Hierarchical Organization of Plasmonic Nanoparticle Assemblies for Optical Applications
