Accommodation Location

How to View Accommodation Details and Booking Options

1. Open the Internships page or the corresponding Topics page.
2. Select the relevant focused area.
3. Select the available duration, mode and internship type.
4. Choose **Offline** mode to access accommodation booking options.
5. Continue to the fee/payment page and use the **Branches Select Option**.
6. After selecting the branch, use **Book NTHRYS Accommodation** to view accommodation fee, facility photographs, amenities and the available booking details.

Tissue Engineering Internship Categories

AI Scaffold Biomaterial Research https://internships.nthrys.com/tissue-engineering/ai-scaffold-biomaterial-research	Machine Learning Vascularization Research https://internships.nthrys.com/tissue-engineering/machine-learning-vascularization-research

Tissue Engineering Internship Topics and Focused Areas

AI Bioprinting Tissue Research

- Machine Learning Models for Bioprinter Path Optimization
- Biomaterial Characterization and Printability Assessment
- Cell Viability Prediction in 3D Bioprinted Constructs
- Tissue Maturation Monitoring through Image Analysis and Segmentation

- Multi-Material Integration and Heterogeneous Tissue Architecture Design

AI Skin Tissue Engineering Research

- Machine Learning Models for Skin Tissue Characterization
- Computational Modeling of Dermal-Epidermal Interactions
- AI-Driven Biomaterial Selection and Optimization
- Bioimage Analysis and Automated Quality Assessment Systems
- Predictive Analytics for Vascularization and Maturation Kinetics

Neurobiotechnology and Brain Organoids

- Brain Organoid Differentiation and Protocol Development
- Neural Cell Characterization and Gene Expression Analysis
- Organoid Imaging and 3D Structural Analysis
- Disease Modeling Using Patient-Derived Organoids
- Functional Assessment of Neuronal Activity in Organoids

Bone Marrow Niche Reconstruction

- Extracellular Matrix Characterization in Bone Marrow Niche
- Biomaterial Development for Niche Reconstruction
- Hematopoietic Stem Cell Culture in Engineered Niches
- Stromal Cell Co-culture Systems for Niche Modeling
- Biophysical Properties and Mechanotransduction in Reconstructed Niches

Tumor Microenvironment Modeling

- 3D Spheroid Culture Development
- Extracellular Matrix Composition and Remodeling
- Hypoxia and Metabolic Microenvironment Simulation
- Immune Cell Integration in Tissue-Engineered Tumors
- Biomaterial Design for TME Reconstruction
