

Agricultural Biotechnology Projects

[Back to All Projects](#) [Agricultural Biotechnology Projects Fee Details](#)

Categories of Agricultural Biotechnology Projects

[Agricultural Biotechnology Industrial Projects](#) [Agricultural Biotechnology Research Projects](#)
[Agricultural Biotechnology Government Projects](#) [Agricultural Biotechnology Academic Projects](#)

- **Industrial Projects**

[Click Here to View Industrial Projects Process Walk through and Cost Breakdown](#)

- Development of Genetically Modified Crops for Enhanced Yield
- Use of Biotechnology in Pest Resistance and Management
- Production of Biofertilizers and Biopesticides
- Applications of CRISPR-Cas9 in Crop Improvement
- Development of Drought-tolerant Crop Varieties
- Biotechnological Approaches to Nutritional Enhancement of Crops
- Use of Plant Tissue Culture in Mass Propagation
- Development of Biofortified Crops for Improved Nutrition
- Applications of Molecular Markers in Plant Breeding
- Use of Biotechnology in Sustainable Agriculture Practices
- Development of Transgenic Plants for Disease Resistance
- Applications of Synthetic Biology in Agriculture
- Use of Metabolic Engineering in Crop Improvement
- Development of Bioplastics from Agricultural By-products
- Applications of Biotechnology in Post-harvest Technology
- Use of Gene Editing Techniques in Crop Development
- Development of Bioenergy Crops through Genetic Engineering
- Applications of Biotechnology in Soil Health Management
- Use of Biotechnology in Enhancing Plant Growth
- Development of Bioremediation Strategies for Agricultural Pollution
- Applications of Biotechnology in the Food Processing Industry
- Use of Genomic Selection in Plant Breeding
- Development of Biopesticides and Bioherbicides
- Applications of Biotechnology in Aquaculture
- Use of Biotechnology in the Development of Functional Foods

- Development of Stress-resistant Crop Varieties
- Applications of Biotechnology in the Production of Biofuels
- Use of Biotechnology in Waste Management in Agriculture
- Development of Biotechnological Solutions for Climate Change Adaptation
- Applications of Biotechnology in Agroforestry
- **Research Projects**

[Click Here to View Research Projects Process Walk through and Cost Breakdown](#)

- Research on Genetic Engineering for Crop Improvement
- Studies on the Development of Disease-resistant Plants
- Research on the Use of CRISPR Technology in Agriculture
- Studies on the Nutritional Enhancement of Food Crops
- Research on Biotechnological Approaches to Pest Management
- Studies on Plant Tissue Culture Techniques
- Research on the Development of Drought-resistant Crops
- Studies on the Use of Molecular Markers in Crop Breeding
- Research on Biofortification and Food Security
- Studies on the Applications of Synthetic Biology in Agriculture
- Research on Metabolic Engineering in Crop Plants
- Studies on the Production of Bioplastics from Agricultural Waste
- Research on Post-harvest Biotechnology
- Studies on Gene Editing and Crop Improvement
- Research on the Development of Bioenergy Crops
- Studies on Soil Health and Biotechnology
- Research on Plant Growth-promoting Biotechnologies
- Studies on Bioremediation Techniques in Agriculture
- Research on Biotechnology in the Food Industry
- Studies on Genomic Selection in Plant Breeding
- Research on Biopesticides and Bioherbicides
- Studies on the Role of Biotechnology in Aquaculture
- Research on Functional Foods and Nutraceuticals
- Studies on the Development of Stress-resistant Plants
- Research on Biofuels and Renewable Energy in Agriculture
- Studies on Biotechnology in Agricultural Waste Management
- Research on Climate Adaptation in Agriculture
- Studies on Biotechnology in Agroforestry
- Research on the Genetic Basis of Crop Traits
- Studies on the Environmental Impact of Biotechnological Crops
- **Government Projects**

[Click Here to View Government Projects Process Walk through and Financials](#)

- Government Policies on the Use of Biotechnology in Agriculture
- Public Funding for Agricultural Biotechnology Research
- Development of National Guidelines for Genetically Modified Crops

- Government Support for Sustainable Agriculture Technologies
 - Policies on the Ethical Use of Biotechnology in Agriculture
 - Public Awareness Campaigns on Biotechnology and Food Security
 - National Action Plans for Climate-resilient Agriculture
 - International Collaboration in Agricultural Biotechnology Research
 - Government Investment in Biotechnological Infrastructure
 - Policies for Biofortification and Nutrition Improvement
 - Regulation of Biopesticides and Biofertilizers
 - Government Guidelines for the Use of Gene Editing in Agriculture
 - Public Sector Initiatives in Biotechnological Crop Development
 - Development of Standards for Biotechnology in Agriculture
 - Government Grants for Research on Pest and Disease Resistance
 - Policies for Sustainable Biotechnological Practices in Agriculture
 - Public Sector Investment in Bioenergy Crop Development
 - Regulation of Biotechnological Solutions for Environmental Issues
 - Government Strategies for Biotechnology in Food Security
 - Development of National Institutes for Agricultural Biotechnology
 - Policies for the Use of Biotechnology in Aquaculture
 - Government Support for Functional Foods and Nutraceuticals
 - Public Engagement in Biotechnology and Agriculture
 - Government Funding for Research on Biotechnological Innovations
 - Development of National Bioinformatics and Biotech Centers
 - Policies for the Use of Biotechnology in Sustainable Agriculture
 - Support for Research on the Environmental Impact of Biotechnology
 - Government Strategies for Enhancing Crop Productivity through Biotechnology
 - Development of National Guidelines for Biotechnology in Food Processing
 - Government Initiatives for Biotechnological Education and Training
- **Academic Projects**

[Click Here to View Academic Projects Process Walk through and Fee Details](#)

- Research on the Application of Biotechnology in Crop Improvement
- Studies on Genetically Modified Organisms in Agriculture
- Research on Biotechnology in Pest and Disease Management
- Studies on the Use of CRISPR-Cas9 in Crop Development
- Research on the Nutritional Enhancement of Crops
- Studies on Plant Tissue Culture and Micropropagation
- Research on the Development of Drought-tolerant Plants
- Studies on the Use of Molecular Markers in Plant Breeding
- Research on Biofortification Techniques in Agriculture
- Studies on Synthetic Biology and its Applications in Agriculture
- Research on Metabolic Pathways in Crop Plants
- Studies on Bioplastics and Biodegradable Materials
- Research on Post-harvest Biotechnology and Food Preservation
- Studies on Gene Editing Technologies in Agriculture
- Research on Bioenergy Crop Development

- Studies on Soil Health and Biotechnology Applications
- Research on Plant Growth Regulators and Biostimulants
- Studies on Bioremediation and Environmental Biotechnology
- Research on Biotechnology in the Food Industry
- Studies on Genomic Selection and Crop Breeding
- Research on Biopesticides and Sustainable Pest Control
- Studies on the Role of Biotechnology in Aquaculture
- Research on the Development of Functional Foods
- Studies on the Genetic Engineering of Stress-resistant Plants
- Research on Renewable Energy and Biofuels in Agriculture
- Studies on Biotechnology in Agricultural Waste Management
- Research on the Impact of Climate Change on Agriculture
- Studies on Agroforestry and Biotechnology
- Research on the Genetic Basis of Crop Improvement
- Studies on the Environmental Impact of Biotechnology in Agriculture
