

## Variant Classification — ACMG/AMP & Evidence Curation — Hands-on

Learn how ACMG/AMP style frameworks are used for variant classification in clinical genomics labs. This module focuses on evidence gathering, criteria assignment, conflict resolution and documentation so that each classification decision is transparent, reproducible and ready for audit or re review in tumor boards and variant meetings.

### Variant Classification — ACMG/AMP & Evidence Curation

#### Session 1

**Fee: Rs 8800** [Apply Now](#)

#### ACMG/AMP Framework & Criteria Codes

Why classification frameworks are needed in clinics

**consistency across cases** **auditability** **communication with clinicians**

ACMG/AMP categories and evidence strength levels

**very strong / strong / moderate / supporting**  
**pathogenic vs benign evidence** **P LP VUS LB B**

## **buckets**

Overview of common criteria codes (high level)

**PVS1, PS, PM, PP examples** **BA, BS, BP examples**  
**allele frequency, segregation, functional readouts**

## **Session 2**

**Fee: Rs 11800** Apply Now

### **Evidence Gathering & Databases**

Key evidence sources for variant curation

**population databases snapshot** **disease and variant**  
**databases snapshot** **literature and case reports**

Types of evidence and how they map to criteria

**allele frequency and constraint data** **segregation and**  
**de novo observations** **functional and computational**  
**evidence**

Documenting evidence in a structured way

**evidence tables** **reference tracking** **rationale fields**  
**for reviewers**

## **Session 3**

**Fee: Rs 14800** Apply Now

### **Classification Workflow & VUS Handling**

Combining criteria into final classification

**rules for P and LP calls** **rules for B and LB calls**  
**conflicting evidence scenarios**

Working with VUS and borderline cases

**when to stay with VUS** **follow up data that can shift**  
**calls** **communication of uncertainty**

Reclassification and version control mindset

**triggers for re review** **tracking previous decisions**  
**change logs for audits**

#### **Session 4**

**Fee: Rs 18800** Apply Now

### Mini Capstone: Evidence Table & Justification

Curate evidence for a small set of variants

**Theory + Practical**

Build an ACMG style evidence and classification table

**criteria codes applied** **strength and direction** **final**  
**classification column**

Write a concise justification ready for reports and reviews

**plain language rationale** **limitations and caveats**  
**notes for future reclassification**
