

Clinical Trials Summer Internships

Join Clinical Trials summer internships to gain hands-on experience in the design, conduct, and analysis of clinical trials, focusing on regulatory compliance, trial protocols, and data management in healthcare research.

Focussed Areas under Clinical Trials Summer Internship

1. Clinical trial design and protocol development
2. Regulatory compliance in clinical trials
3. Data management and analysis in clinical trials
4. Patient recruitment and retention strategies
5. Good Clinical Practice (GCP) guidelines
6. Clinical trial monitoring and auditing
7. Safety reporting and adverse event management
8. Statistical methods in clinical trials
9. Ethical considerations in clinical trial conduct
10. Phase I-IV clinical trials in drug development
11. Randomized controlled trials (RCTs)
12. Clinical trial data capture and management
13. Informed consent and patient communication
14. Blinding and randomization in trials
15. Electronic data capture (EDC) in clinical trials
16. Trial quality assurance and risk management
17. Clinical trial logistics and site management
18. Adaptive trial designs and implementation
19. Real-world evidence (RWE) in clinical research
20. Post-marketing surveillance and observational trials

Protocols Covered across various focussed areas under Clinical Trials Summer Internship

1. Clinical trial protocol development and review
2. Data capture and management in clinical trials
3. Randomization and blinding techniques in trials
4. Safety reporting and adverse event documentation
5. Statistical analysis plans for clinical trials
6. Electronic data capture (EDC) setup for clinical trials
7. Good Clinical Practice (GCP) implementation

8. Informed consent process and documentation
9. Trial monitoring and auditing protocols
10. Quality assurance in clinical trials

Duration: 5, 10, 15, 20, and 30 Days

Note: Please cross confirm whether internship slots for this field are available before joining.
