

Translational Research PhD Research Assistance by NTHRYS

PhD in Translational Research aims to bridge basic science discoveries and real world clinical or public health applications through rigorous intermediate studies. This doctoral program highlights biomarker validation, early phase trials, implementation science, health services research, community engagement, regulatory pathways, stakeholder partnerships and impact evaluation. Researchers design and execute translational projects across the T0 to T4 continuum, publish interdisciplinary work and help ensure that promising laboratory findings evolve into effective, scalable and equitable interventions for patients and populations.
