

## Vaccine Biotechnology PhD Research Assistance by NTHRYS

PhD in Vaccine Biotechnology focuses on discovery, design, production and evaluation of vaccines using classical and modern biotechnological approaches. This doctoral program highlights antigen selection, epitope mapping, platform technologies, recombinant subunit and vector vaccines, adjuvants, immune correlates, manufacturing, quality control, cold chain and regulatory science. Researchers collaborate with immunologists and public health experts, publish vaccine research and support development of safe, effective and accessible vaccines for infectious diseases, cancer and emerging health threats.
