Service Segment - Method Validation & QA (LOD/LOQ/Precision) Charge: Rs 11800

Build a compact but complete method validation package aligned to your discipline standards. We document linearity, accuracy, precision, LOD and LOQ estimation, robustness checks and QC charts, ending in a signable validation summary that you can append to your thesis or methods appendix.

Linearity, range and calibration model selection for key analytes

Accuracy and recovery, with intra day and inter day precision estimates

LOD and LOQ estimation approach with clear justification and formulas

Robustness tests across temperature, time and operator related factors

QC charts and control material strategy for routine monitoring

Validation summary document and sign off checklist in DOCX and PDF
