AI App Development (LLMs + Mobile + Cloud) Development & Deployment Training

App Development • Artificial Intelligence • Cloud Systems

Fee: ?8,00,000 | Duration: 12 Months | Cohort Size: 20 (Invite-Only)

Back to Corporate Training

THIS IS NOT A COURSE THIS IS A FUTURE-TECH PRODUCT ECOSYSTEM

Most programs teach current tools. This training is built around technologies that will dominate the next decade, while you build and deploy a real AI-powered product.

You don't graduate as a developer. You graduate as a **Next-Generation Product Engineer**.

What You Will Build

A production-grade AI-powered super app featuring intelligent personalization, AI recommendation engines, a secure cloud backend, scalable mobile architecture, and revenue & analytics systems.

Technologies You Will Master

(Built for the Next 5–10 Years)

FOUNDATION APP

Next-Gen App Engineering

Click **View Details** for the exact skills and build focus in this module.

View Details

Highlights

Flutter (production-scale, multi-platform)
SwiftUI (modern iOS architecture)

AI-NATIVE **MOBILE**

AI-Native Application Development

Click **View Details** for the exact skills and build focus in this module.

View Details

Highlights

AI-first app architecture
Large Language Models (LLMs) integration

GEN-AI **SYSTEMS**

Generative AI & Intelligent Systems

Click **View Details** for the exact skills and build focus in this module.

View Details

Highlights

AI chat systems inside mobile apps
Text, voice & multimodal AI interfaces

CLOUD **SERVERLESS**

Cloud-Native & Serverless Architectures

Click **View Details** for the exact skills and build focus in this module.

View Details

Highlights

Microservices & event-driven systems
Serverless backends (Functions, Lambdas)

SCALE **ARCH**

Distributed Systems & High-Scale Engineering

Click **View Details** for the exact skills and build focus in this module.

View Details

Highlights

Scalable backend design
High-availability systems

DATA **AI**

AI + Data Engineering for Apps

Click **View Details** for the exact skills and build focus in this module.

View Details

Highlights

Data pipelines for AI-driven apps
Feature engineering for personalization

DEVOPS **AUTOMATION**

DevOps, Automation & Platform Engineering

Click **View Details** for the exact skills and build focus in this module.

View Details

Highlights

CI/CD automation
Containerization (Docker, Kubernetes)

SECURITY **ZERO-TRUST**

Cybersecurity & Zero-Trust Systems

Click **View Details** for the exact skills and build focus in this module.

View Details

Highlights

Zero-trust app architecture
Secure API gateways

PRODUCT **MONETIZATION**

Product Engineering & Monetization Tech

Click **View Details** for the exact skills and build focus in this module.

View Details

Highlights

Product analytics & telemetry
AI-driven user behavior analysis

WHAT YOU GRADUATE WITH

Publicly launched AI-powered app

Ownership of advanced AI modules

Cloud-native & scalable system expertise

World-class product engineering portfolio

Industry & startup readiness

CAREER PATHS (FUTURE-READY)

AI Product Engineer • Mobile AI Architect • Full-Stack Product Engineer • Platform Engineer • Startup Technical Co-Founder • R&D Engineer (AI Systems)

Expected CTC Potential: ?12–25 LPA (India) | Global Remote Roles

Admissions

Invite-only cohort. Contact admissions for screening and batch details.
WhatsApp +91-8977624748

WHY THIS PROGRAM COSTS ?8,00,000

You are investing in:

Future-proof technologies

Real product ownership

AI + Cloud infrastructure

Career acceleration, not certificates

Cheaper than learning outdated skills for years
